Preface	v
About This Book	xi
About These Authors	xii
1 Model-based and Randomization-based Methods	1
By Alex Dmitrienko and Gary G. Koch	
1.1 Introduction	1
1.2 Analysis of continuous endpoints	4
1.3 Analysis of categorical endpoints	20
1.4 Analysis of time-to-event endpoints	41
1.5 Qualitative interaction tests	56
References	61
2 Advanced Randomization-based Methods	67
By Richard C. Zink, Gary G. Koch, Yunro Chung and Laura Elizabeth Wiener	
2.1 Introduction	67
2.2 Case studies	70
2.3 %NParCov4 macro	73
2.4 Analysis of ordinal endpoints using a linear model	74
2.5 Analysis of binary endpoints	78
2.6 Analysis of ordinal endpoints using a proportional odds model	79
2.7 Analysis of continuous endpoints using the log-ratio of two means	80
2.8 Analysis of count endpoints using log-incidence density ratios	81
2.9 Analysis of time-to-event endpoints	82
2.10 Summary	86
3 Dose-Escalation Methods	101
By Guochen Song, Zoe Zhang, Nolan Wages, Anastasia Ivanova, Olga Marchenko and Alex Dmitrienko	
3.1 Introduction	101
3.2 Rule-based methods	103
3.3 Continual reassessment method	107
3.4 Partial order continual reassessment method	116
3.5 Summary	123
References	123

4	Dose-finding Methods	127
	By Srinand Nandakumar, Alex Dmitrienko and Ilya Lipkovich	
4.1	Introduction	127
4.2	Case studies	128
4.3	Dose-response assessment and dose-finding methods	132
4.4	Dose finding in Case study 1	145
4.5	Dose finding in Case study 2	160
	References	176
5	Multiplicity Adjustment Methods	179
	By Thomas Brechenmacher and Alex Dmitrienko	
5.1	Introduction	179
5.2	Single-step procedures	184
5.3	Procedures with a data-driven hypothesis ordering	189
5.4	Procedures with a prespecified hypothesis ordering	202
5.5	Parametric procedures	212
5.6	Gatekeeping procedures	221
	References	241
	Appendix	244
6	Interim Data Monitoring	251
	By Alex Dmitrienko and Yang Yuan	
6.1	Introduction	251
6.2	Repeated significance tests	253
6.3	Stochastic curtailment tests	292
	References	315
7	Analysis of Incomplete Data	319
	By Geert Molenberghs and Michael G. Kenward	
7.1	Introduction	319
7.2	Case Study	322
7.3	Data Setting and Methodology	324
7.4	Simple Methods and MCAR	334
7.5	Ignorable Likelihood (Direct Likelihood)	338
7.6	Direct Bayesian Analysis (Ignorable Bayesian Analysis)	341
7.7	Weighted Generalized Estimating Equations	344
7.8	Multiple Imputation	349
7.9	An Overview of Sensitivity Analysis	362
7.10	Sensitivity Analysis Using Local Influence	363
7.11	Sensitivity Analysis Based on Multiple Imputation and Pattern-Mixture Models	371
7.12	Concluding Remarks	378
	References	378
	Index	385
