Foreword vii

Acknowledgments ix

Chapter 1 Using This Book 1

1.1 Origins of This Book 2

1.2 Purpose 3

1.3 Audience 3

1.4 Prerequisites 4

1.5 What's Unique About This Book? 4

1.6 Chapter Contents 5

1.7 Chapter Layout 8

1.8 Step-by-Step Analysis Instructions 10

1.9 JMP Software 12

1.10 Scope 15

1.11 Typographical Conventions 17

1.12 References 21

Chapter 2 Overview of Statistical Concepts and Ideas 23

2.1 Why Statistics? 24

2.2 Measurement Scales, Modeling Types, and Roles 28

2.2.1a Nominal Scale 29

2.2.1b Ordinal Scale 29

2.2.1c Interval Scale 29

2.2.1d Ratio Scale 29

2.2.2 Which Scale? 30

2.2.3 Responses and Factors 31

2.3 Statistical Inference: From a Sample to a Population 34

2.3.1 Random Sampling 38

2.3.2 Randomization 42

2.4 Descriptive Statistics and Graphical Displays 44
2.5 Quantifying Uncertainty: Common Probability Distributions 55
2.5.1 Normal Distribution 59
2.6 Useful Statistical Intervals 65
2.6.1 Confidence Interval for the Mean 67
2.6.2 Prediction Interval for One Future Observation 67
2.6.3 Tolerance Interval to Contain a Given Proportion *p* of the Sampled Population 68
2.6.4 What Does Confidence Level Mean? 71
2.7 Overview of Tests of Significance 74
2.7.1 Critical Components of a Test of Significance 75
2.7.2 A 7-Step Framework for Statistical Studies 77
2.8 Summary 79
2.9 References 79

Chapter 3 Characterizing the Measured Performance of a Material, Process, or Product 81
3.1 Problem Description 82
3.2 Key Questions, Concepts, and Tools 83
3.3 Overview of Exploratory Data Analysis 85
3.3.1 Description and Some Applications 85
3.3.2 Descriptive Statistics 86
3.3.3 Graphs and Visualization Tools 93
3.3.4 Statistical Intervals 102
3.4 Step-by-Step JMP Analysis Instructions 104
3.5 Summary 148
3.6 References 149

Chapter 4 Comparing the Measured Performance of a Material, Process, or Product to a Standard 151
4.1 Problem Description 152
4.2 Key Questions, Concepts, and Tools 153
4.3 Overview of One-Sample Tests of Significance 155

4.3.1 Description and Some Applications 155
4.3.2 Comparing Average Performance to a Standard 156
4.3.3 Comparing Performance Variation to a Standard 165
4.3.4 Sample Size Calculations for Comparing Performance to a Standard 170
4.4 Step-by-Step JMP Analysis Instructions 181
4.5 Test of Equivalence 213
4.6 Summary 215
4.7 References 215

Chapter 5 Comparing the Measured Performance of Two Materials, Processes, or Products 217
5.1 Problem Description 218
5.2 Key Questions, Concepts, and Tools 219
5.3 Overview of Two-Sample Significance Test 221
5.3.1 Description and Some Applications 221
5.3.2 Comparing Average Performance of Two Materials, Processes, or Products 223
5.3.3 What To Do When We Have Matched Pairs 232
5.3.4 Comparing the Performance Variation of Two Materials, Processes, or Products 236
5.3.5 Sample Size Calculations 242
5.4 Step-by-Step JMP Analysis Instructions 248
5.5 Equivalence of Two Materials, Processes, or Products 286
5.6 Summary 289
5.7 References 290

Chapter 6 Comparing the Measured Performance of Several Materials Processes, or Products 291
6.1 Problem Description 292
6.2 Key Questions, Concepts, and Tools 293
6.3 Overview of One-way ANOVA 295

6.3.1 Description and Some Applications 295
6.3.2 Comparing Average Performance of Several Materials, Processes, or Products 297
6.3.3 Multiple Comparisons to Detect Differences Between Pairs of Averages 312
6.3.4 Comparing the Performance Variation of Several Materials, Processes, or Products 320
6.3.5 Sample Size Calculations 326
6.4 Step-by-Step JMP Analysis Instructions 331
6.5 Testing Equivalence of Three or More Populations 365
6.6 Summary 367
6.7 References 368

Chapter 7 Characterizing Linear Relationships between Two Variables 369
7.1 Problem Description 370
7.2 Key Questions, Concepts, and Tools 371
7.3 Overview of Simple Linear Regression 373
7.3.1 Description and Some Applications 373
7.3.2 Simple Linear Regression Model 376
7.3.3 Partitioning Variation and Testing for Significance 384
7.3.4 Checking the Model Fit 388
7.3.5 Sampling Plans 412
7.4 Step-by-Step JMP Analysis Instructions 417
7.5 Einstein's Data: The Rest of the Story 453
7.6 Summary 457
7.7 References 459

Index 461
