

Applied Econometrics with SAS®: Modeling Demand, Supply, and Risk. Full book available for purchase [here](#).

Contents

Chapter 1. Introduction	1
1.1 Overview	1
1.2 Applications of Economic Analysis	2
1.3 Intended Audience	3
1.4 Examples for Hands-On Practice	4
Chapter 2. Theory of Demand	5
2.1 Overview	5
2.2 Preference Axioms and the Utility Function	6
2.3 Utility and Marshallian Demands	8
2.3.1 A Graphical Look at Utility and Demand	9
2.4 Indirect Utility	14
2.5 Hicksian Demands and Expenditures	15
2.5.1 The Slutsky Equation	17
2.6 Elasticities	18
2.7 Separability and Aggregation	20
Chapter 3. Empirical Approaches to Demand Analysis	23
3.1 Overview	23
3.2 Double Logarithmic Demand Functions	24
3.2.1 The Double Log Form	25
3.2.2 Empirical Analysis	25
3.3 Rotterdam Model	29
3.3.1 Absolute Price and Relative Price Rotterdam Formulations	30
3.3.2 Empirical Analysis	33
3.4 Almost Ideal Demand System	44
3.4.1 Full and Linear Approximate AIDS Models	44
3.4.2 Empirical Analysis	46
3.5 Demand for Differentiated Products	54
3.5.1 Discrete Choice	55
3.5.2 Logit Models	57
3.5.3 Empirical Analysis	60
3.6 Conclusion	74
Chapter 4. Theory of Supply	75
4.1 Overview	75
4.2 The Production Function	76
4.3 The Cost Function and Derived Factor Demands	77
4.4 The Profit Function	79
4.4.1 Profit Derived Factor Demands	80
4.4.2 Elasticities	80
4.5 Concepts of Time in Production	81
4.6 Separability and Aggregation	81
Chapter 5. Empirical Approaches to Supply Analysis	83
5.1 Overview	83
5.2 Cobb–Douglas Production	84
5.2.1 Econometric Analysis	85
5.3 Translog Functional Form	91
5.3.1 Empirical Analysis	93
5.4 Frontier Production Functions	104

iv Contents

5.4.1	Empirical Analysis	107
Chapter 6.	Empirical Approaches to Risk	113
6.1	Overview	113
6.2	Frequency and Severity Modeling	114
6.2.1	Compound Distribution Model	115
6.2.2	Empirical Analysis	116
6.3	Agricultural Insurance	124
6.3.1	Yield Insurance	125
6.3.2	Empirical Analysis	125
6.3.3	Revenue Insurance	142
6.3.4	Dependence and Copulas	143
6.3.5	Empirical Analysis	146
