Acknowledgments xiii
About This Book xv

Part 1 Introduction 1

Chapter 1 Why Use ODS? 3

Limitations of SAS Listing Output 4
Difficulties with Importing Standard Listing Output into a Word Processor 6
ODS Output: A Variety of Formats to Fit Your Needs 8

Chapter 2 ODS Basics 13

Overview 14
Table Definitions and Style Definitions 16
Output Objects and Output Destinations 18
ODS References and Resources 20

Part 2 The Basics 21

Chapter 3 HTML Output 23

Generating Your First HTML File 24
Exploring the Body File: The Basics of HTML 26
Exploring the HTML Body File: Graphics 28
Combining the Results of Several Procedures 30
Generating a Table of Contents 32
Exploring the Frame File 34
Breaking Up Output into Separate Files 36
Simulating Page Breaks Using Cascading Style Sheets 38
More on Page Breaks Using the NEWFILE= Option 40
Changing Procedure Labels in the Table of Contents 42
Changing Multiple Procedure Labels 44
Changing the Title Bar 46
Creating Alternate HTML Formats 48
Creating Multiple Copies of the Same Output 50
Exploring Links and Anchors 52
Using Links and Anchors to Link Your Results to Your Web Site 54

Adding HTML Code to Customize Your Output 56
Limiting Inclusion of HTML Tags in Output 58
Applying Inline Formatting 60
Adding JavaScript to Your Output 62
Creating and Using Cascading Style Sheets 64
Creating Drill-Downs within Output Tables 66
Creating Output with Just the Results 68
Appending to an Existing HTML File 70
Appending to an Existing Table of Contents 72
Moving ODS Output into Your Internet or Intranet Site 74
Sending HTML Results Automatically via E-Mail 76
Importing Your ODS Output into a Spreadsheet 78
Using ODS Suboptions 80

Chapter 4 RTF Output 81

Creating Your First RTF File 82
Importing into a Word Processor 84
Working with Headers and Footers in Microsoft Word 86
Handling Page Breaks in RTF Output 88
Controlling Page Orientation 90
Controlling Page Size 92
Controlling Page Breaks 94
Controlling Page Margins 96
Creating Multiple Columns on a Page 98
Adding "Page X of Y" to RTF Reports 100
Adding Static or Dynamic Dates 102
Adding Customized Dates 104
Placing Title and Footnote Text in the Body of the Document 106
Adding Images to RTF Output 108
Adding Text 110
Adding More Complex Text 112
Adding Hyperlinks to RTF Output 114
Adding a Table of Contents to RTF Output 116
Completing the Table of Contents 118
Specifying Metadata in Your RTF File 120
Aligning Decimals in RTF Output 122
Exploring RTF as Created by Microsoft Word 124
Inserting Field Codes into Your RTF Output 126
Enhancing RTF Output by Using RTF Control Words and Field Codes 128

Sending RTF Field Codes and Control Strings Only to RTF Output 130
Importing RTF Output into a Slide Show 132
More Enhancement of RTF Output Using RTF Control Words 134
The New TAGSETS.RTF Destination 136
Inserting Text with the PREPAGE= Option 138
Using the TAGSETS.RTF OPTIONS Suboptions 140
Generating a Table of Contents with TAGSETS.RTF 142
Changing Table Headers with RTF Control Strings 144
Rotating or Aligning Table Headers with RTF Control Strings 146
Adding Hyperlinks to TAGSETS.RTF Output 148

Chapter 5 PDF Output 151

Creating a PDF File 152
Creating Bookmarks in Your PDF File 154
Modifying the Display of Bookmarks in Your PDF File 156
Creating PDF Files That Include Hyperlinks and Annotations 158
Another Means of Adding Hyperlinks and Annotations to PDF Output 160
Optimizing PDFs to Reduce Size and Increase Compatibility 162
Creating PDFs with Customized Metadata 164
Creating a Linked Set of PDF Results 166
Adding "Page X of Y" Numbers to PDF Output 168
Controlling Page Breaks 170
Sending ODS Output to Your Printer 172
Selecting a Printer 174
Creating a PostScript File from Your ODS Printer Output 176
Using the SAS Printer Drivers 178
Using the SAS PostScript Driver 178
Printing in Color 180
Creating Consistent Printed Pages 182
Creating Multiple Columns on a Page 184
Controlling Page Orientation 184
Controlling Page Margins 186
Controlling Page Size 186
Creating Multiple Versions of the Same Output 188
SAS System Options That Affect ODS Printer Output 190
Converting to PDF with Acrobat 192

Part 3 Output Structure 195

Chapter 6 Exploring ODS Output 197

The ODS TRACE Statement 198
Identifying Output Objects in Your Listing 200
Identifying Output Objects by Label Path 202
Viewing the Results 204
TRACE Examples: Other Procedures 206
TRACE Examples: Procedures without ODS Output 208

Chapter 7 Output Data Sets 211

Creating a Single Output Data Set 212
Comparing ODS Output Data Sets to Printed Output 214
Creating Multiple Output Data Sets from a Single Procedure 216
Creating Output Data Sets from Procedures with Complex Output 218
Creating Output Data Sets from Multiple Procedures: Part 1 220
Creating Output Data Sets from Multiple Procedures: Part 2 222
Creating Output Data Sets without Printed Output 224
Tip: Turning Off Output to the Results Window 226
Opening and Closing Output Data Sets 228
Using Data Set Options with Output Data Sets 230
Creating ODS Output Data Sets from the PRINT and REPORT Procedures 232

Chapter 8 Limiting ODS Output 235

Selecting a Subset of Your Results 236
Selecting Multiple Output Objects 238
Excluding the Output You Don't Want 240
Selecting Output for Multiple Procedures 242
Customizing Your Selections for Each Output Destination 244
Selecting Complex Combinations of Output Objects 246
Identifying the Current Selections and Exclusions 248
Selecting with WHERE Conditions 250

Chapter 9 Using ODS in the DATA Step 255

Creating ODS Output in the DATA Step Using FILE and PUT Statements 256
Naming and Labeling the DATA Step Output Object 258
Selecting Variables to Include in the Output 260
Controlling the Layout of the Output 262

Labeling and Formatting the Columns of the Results 264
Modifying Output with the PUT Statement 266
Applying Inline Formatting 268
Using FILE PRINT Options and ODS 270

Chapter 10 Creating Custom Reports from the DATA Step 271

Understanding the Table Definition Used by the DATA Step 272
Creating a Custom Table Template with a DATA Step 274
Calculating Columns in a Custom Table Template 276
Creating Spanning Column Headers in a Custom Table Template 278
Creating a Custom HTML Table Definition 280
Performing Traffic Lighting in a Custom Table Template 282
Using Generic Columns in a Table Template 284
Using Macro Variables in a Custom Table Template 286
Using Dynamic Variables as Attribute Values in a Custom Table Template 288

Chapter 11 Modifying and Replaying ODS Output 293

The ODS DOCUMENT Destination 294
Using the Documents Window 296
Using PROC DOCUMENT to Manage Document Stores 298
Replaying a Document Store Using PROC DOCUMENT and Pop-Up Menus 300
Understanding the Fundamental Concepts of the ODS DOCUMENT Destination 302
Creating a New Document Store Interactively 304
Creating a New Document Store Interactively (continued) 306
Creating a New Document Store Interactively (continued) 308
Changing Titles and Page Breaks 310
Creating a New Document Store Using PROC DOCUMENT 312
Copying Objects into a New Document Store Using PROC DOCUMENT 314
Adding Titles and Correcting Page Breaks after Copying Output Objects to a New Document 316
Using the SASEDOC LIBNAME Engine 318
Summary of PROC DOCUMENT Statements 320

Chapter 12 Using Tagsets to Generate MARKUP Output 321

ODS MARKUP Destination 322
Creating CSV Files with ODS MARKUP 324
Creating HTML Result Files with ODS MARKUP 326
Creating XML Files with ODS MARKUP 328
Learning More about ODS MARKUP Tagsets 330
Modifying Tagset Events 332
Creating a Custom Tagset 334
Using a Custom Tagset Template 336
More about Tagset Templates 338
More about Using the Doc="Help" Sub-Option 340

Part 4 Output Style 343

Chapter 13 Style Template Definitions 345

Viewing a List of Available Style Template Definitions 346
Changing Style Template Definitions 348
Examining the Components of an ODS Style Template Definition 350
Modifying a Style Template Definition: A Simple Example 352
Finding Your Custom Style Template Definitions 354

Chapter 14 Understanding the Built-In Style Template Definitions 357

Understanding the Default Style in SAS 9.1.3 358
Understanding the Default Style in SAS 9.2 360
Understanding the Default Style in SAS 9.2 (continued) 362
Understanding the Color Style Elements 364
Understanding the Font Style Elements 366
Understanding the HTML and Text Style Elements 368
Understanding the Abstract Style Elements 370
Changing Specific Style Elements 372
Startup and Shutdown Elements 374
Changing HTML Frames, Indexes, and Tables of Contents 376
Changing HTML Body Style Attributes 378
Changing Table Style Elements (Part 1 of 2) 380
Changing Table Style Elements (Part 2 of 2) 382
Changing Header-Related and Data Cell-Related Style Elements (Part 1 of 2) 384

Changing Header-Related and Data Cell-Related Style Elements (Part 2 of 2) 386
Adding Images to Style Elements 388
Modifying Titles and Footnotes Using Style Elements (Part 1 of 2) 390
Modifying Titles and Footnotes Using Style Elements (Part 2 of 2) 392
Understanding the Differences in the ODS Printer Style 394
Understanding Differences in the RTF Style 396

Chapter 15 Modifying Output Fonts 399

Identifying the Font Definitions for Each Part of Your Output 400
Modifying the Default Font Sizes for HTML Output 402
Modifying the Default Font Sizes for Printer Output 404
Modifying the Default Font Sizes for RTF Output 406
Modifying the Default Typefaces 408
Identifying Available Fonts 410
Modifying the Default Font Weights, Font Styles, and Font Widths 412
Creating a New Font Definition 414
Modifying Fonts for Procedures That Use Fixed-Width Fonts 416

Chapter 16 Modifying Output Structure 419

Modifying the Table Borders 420
Removing the Table Borders and Rules 422
Removing Table Borders and Rules from Printer Output 424
Changing the Spacing Inside Tables 426
Removing Numbers from the Table of Contents in HTML Output 428
Setting the Width for HTML Output 430
Controlling RTF Page Margins 432
Simulating Listing Output with FILE PRINT ODS 434
Hiding Procedure Titles 436

Chapter 17 Modifying Output Colors and Images 439

Exploring the Style Elements That Control Color 440
Modifying the Color of Your Titles 442
Identifying Colors 444
Modifying Background Colors 446
Modifying Colors in Tables 448
Adding a New Color to the Color Scheme 450
Designing a Template to Enhance Accessibility 452
Adding a Logo to Your Output 454
Adding a Logo and a Custom Heading to Your HTML Output 456

Adding a Background Image to Your HTML Output 458
Adding Images to RTF Output (with Templates) 460
Adding Images to Each Page of Your RTF Output 462
Adding Images to Printer Output (with Templates) 464

Chapter 18 Doing More with Styles and ODS 467

Using the CSSSTYLE= Option 468
Creating a Style Template to Match Corporate Style Guidelines 470
Using the CSSSTYLE= Option with @media Style Properties 472
Using Multiple CSS Files with ODS HTML 474
Using Custom Class Selectors with ODS HTML 476
Creating a Custom Style for Use with a Custom Table Template 478
Using Style Templates to Make Smaller Output Files 480
Inserting an Image with a Style Template 482
Using RTF Control Strings with a Style Template 484
Storing and Retrieving a Personal or Group Template 486
Removing Access to a Personal or Group Template 488
Specifying an Alternate Template as a Backup 490

Chapter 19 Special Cases: The REPORT, TABULATE, and PRINT Procedures 493

Changing PROC REPORT Column Heading Style Attributes 494
Changing PROC REPORT Table Cell Style Attributes 496
Changing PROC REPORT Row Style Attributes 498
Changing PROC REPORT Subtotals and Totals Style Attributes 500
Adding Traffic Lighting to PROC REPORT Table Values 502
Adding Graphics to PROC REPORT Tables 504
Creating an Output Data Set from PROC REPORT 506
Controlling Column Widths with PROC REPORT 508
Inserting Blank Lines with PROC REPORT 510
Creating Cleaner PROC REPORT Output Using SPANROWS 512
Changing PROC TABULATE Row and Column Heading Style Attributes 514
Changing PROC TABULATE BOX= Option Formatting 516
Changing PROC TABULATE Table Cell Style Attributes 518
Changing PROC TABULATE Row Style Attributes 520
Changing PROC TABULATE Subtotals and Totals Style Attributes 522
Adding Traffic Lighting to PROC TABULATE Table Values 524
Adding Graphics to PROC TABULATE Tables 526
Creating an Output Data Set from PROC TABULATE 528

Controlling Column Widths with PROC TABULATE 530
Changing PROC PRINT Column Heading Style Attributes 532
Changing PROC PRINT Table Cell Style Attributes 534
Changing PROC PRINT Style Attributes for Totals 536
Indenting Values with Margin Attributes Using LEFTMARGIN= 538
Indenting Values with Margin Attributes 540
Style Attributes for the REPORT, TABULATE, and PRINT Procedures 542

Chapter 20 Understanding ODS Graphics Output 543

Understanding Graphics Creation in SAS 9.2 544
Generating Graphics Output from SAS Procedures Using the ODS GRAPHICS Statement 546
Creating Graphic Images with the ODS Statistical Graphics Framework 548
Creating Graphics Output with the Statistical Graphics (SG) Procedures 550
Creating Output Using Graph Templates and the SGRENDER Procedure 552
Creating HTML Output with SAS/GRAPH 554
Using ODS Options and SAS/GRAPH Options to Change Output 556
Understanding Devices and Destinations 558
More about Devices and Destinations 560
Creating HTML Output: Graphs as GIFs or JPEGs 562
Creating HTML Output: Graphs as Java 564
Creating HTML Output: Graphs as ActiveX 566
Creating RTF Output: Graphs as ActiveX 568
Combining Graphs with Text Output 570
Additional SAS/GRAPH and ODS Resources 572

Appendix Operating System Differences 575

Setting Up the Example for Windows 576
Revising the Example for UNIX (HPUX, Sun, Solaris, Linux, etc.) 577
Revising the Example for z/OS 578
Revising the Example for OpenVMS 581
Sources of Additional Information 582

Index 583
