

From *Simulating Data with SAS*<sup>®</sup>. Full book available for purchase [here](#).

# Contents

---

<b>Acknowledgments</b>	<b>v</b>
<b>I Essentials of Simulating Data</b>	<b>1</b>
Chapter 1. Introduction to Simulation .....	3
Chapter 2. Simulating Data from Common Univariate Distributions .....	11
Chapter 3. Preliminary and Background Information .....	29
<b>II Basic Simulation Techniques</b>	<b>49</b>
Chapter 4. Simulating Data to Estimate Sampling Distributions .....	51
Chapter 5. Using Simulation to Evaluate Statistical Techniques .....	73
Chapter 6. Strategies for Efficient and Effective Simulation .....	93
<b>III Advanced Simulation Techniques</b>	<b>107</b>
Chapter 7. Advanced Simulation of Univariate Data .....	109
Chapter 8. Simulating Data from Basic Multivariate Distributions .....	129
Chapter 9. Advanced Simulation of Multivariate Data .....	153
Chapter 10. Building Correlation and Covariance Matrices .....	175
<b>IV Applications of Simulation in Statistical Modeling</b>	<b>195</b>
Chapter 11. Simulating Data for Basic Regression Models .....	197
Chapter 12. Simulating Data for Advanced Regression Models .....	225
Chapter 13. Simulating Data from Times Series Models .....	251
Chapter 14. Simulating Data from Spatial Models .....	263
Chapter 15. Resampling and Bootstrap Methods .....	281
Chapter 16. Moment Matching and the Moment-Ratio Diagram .....	297
<b>V Appendix</b>	<b>323</b>
Appendix A. A SAS/IML Primer .....	325
<b>Index</b>	<b>339</b>
