Part 1 Basic Foundation

Chapter 1 Introduction to Statistics 3

Why Study Statistics? 4
The Traditional View of Statistics 5
The Modern View of Statistics 6
- **A Process View of Organizations 6**
- **Changes in Statistical Pedagogy 7**
- **Changes in Information Technology 9**
- **How Is This Modern View of Statistics Different? 9**

Important Concepts in Statistics 10
- **Populations and Samples 10**
- **Parameters and Statistics 10**
- **Descriptive and Inferential Statistics 11**
- **Sampling and Nonsampling Error 11**
- **Statistical Inference and the Discovery Process 12**

Collecting Data 13
- **Collecting Primary Data 15**
- **Surveys and Observation 15**
- **Experiments and Post-Hoc Studies 17**
- **A Classification of Data-Gathering Situations 17**

Types of Data 18
- **Quantitative versus Qualitative Variables 18**
- **Discrete and Continuous Variables 19**
- **Scales of Measurement 20**

Computers and Statistical Analysis: Introducing JMP 22
The Inland Northwest Credit Union 22
Summary 23
Chapter Glossary 24
Questions and Problems 25
References 26
Notes 26

Chapter 2 Introduction to JMP 27

JMP Software 28
The JMP Starter 29
The Situation at INCU 32
Creating Data Tables 33
Adding Columns 35
Entering Data into the Data Table 35
Data Types and Modeling Types 38
Working with Data Tables 39
Combining Data Tables 39
Using Value Labels 46
Reshaping Data Tables 48
Sorting Data Tables 48
Filtering Data and Creating Subsets of Data Tables 49
Analysis Platforms 53
The Distribution Platform 53
Fit Y by X Platform 54
Matched Pairs Platform 54
Fit Model Platform 54
Working with Reports 55
Formatting Report Tables 55
Copying and Printing Reports 57
Performing Further Analysis 58
Summary 58
Chapter Glossary 59
Questions and Problems 60
Notes 63

Part 2 Visualizing Data: Descriptive Statistics

Chapter 3 Visualizing Data in Tables and Graphs 67

The Situation at INCU 68
Statistical Tables 69
Summary Tables 69
Tabulate Command 72
The Graph Command 74
Charts for Qualitative Data 75
Bar Charts 75
Pie Charts 78
Tree Maps 79
Graphs for Quantitative Data 81
Histograms 81

Stem-and-Leaf Diagrams 83
Line Charts 84
Looking at Relationships 87
Scatter Plots 87
Bubble Plots 89
Contingency Tables 91
Mosaic Plots 92
Exploring Data Using Graph Builder 94
Summary 97
Chapter Glossary 98
Questions and Problems 99
References 100
Notes 100

Chapter 4 Summarizing Univariate Data: The Distribution Platform 101

The Situation at INCU 102
The Distribution Platform 103
Summarizing Quantitative Variables 104
Graphic Analysis Panel 106
Quantiles Panel 111
Moments Panel 113
Additional Moments 120
Summary Measures for Qualitative Variables 123
Frequencies Panel 125
Summarizing by a Qualitative Variable 126
Summary 129
Chapter Glossary 130
Questions and Problems 132
Notes 133

Part 3 Going Beyond the Data—Inferential Statistics

Chapter 5 Foundations of Statistical Inference 137

The Situation at INCU 138
Populations and Samples 138
Population Parameters and Sample Statistics 140
Sampling in Statistics 140
Simple Random Samples 141
Sampling and Inferential Statistics 144
The Meaning of Probability 144

Probability Distributions 146
Discrete Probability Distributions 146
Continuous Probability Distributions 153
The Concept of a Sampling Distribution 162
Sampling Distributions as a Population of Values 163
Sampling Distributions as a Probability Distribution 165
Sampling Distributions for Common Sample Statistics 165
Sampling Distributions for the Mean 166
Sampling Distributions for the Standard Deviation and Variance 170
Sampling Distributions for the Proportion 171
Sampling Distributions for the Median 172
The Concept of Bootstrapping 173
Summary 174
Chapter Glossary 175
Questions and Problems 177
References 177
Notes 178

Chapter 6 Introduction to Statistical Inference 179

The Situation at INCU 181
Introduction to Estimation 181
The Concept of Sampling Error 182
Interval Estimation 183
Finding the Right Sample Size 184
Introduction to Hypothesis Testing 184
***p*-Values 188**
Tests of Equivalence 189
JMP and Inferences about One Variable 191
Inferences about Means 194
Inferences about Variances and Standard Deviations 197
Inferences about Medians 199
Sign Test for Medians 199
Bootstrapping Inference about the Median 202
Inferences about Proportions 203
Finding the Right Sample Size for Proportions 206
Summary 207
Chapter Glossary 208
Questions and Problems 209
References 210
Notes 210

Part 4 The Effects of One Variable on Another

Chapter 7 Effects of a Qualitative Variable on a Quantitative Variable 215

The Situation at INCU 216
Qualitative Variables and Grouping 216
Independent and Dependent Variables (Factor and Response) 217
Independent versus Dependent Groups 217
Qualitative Variables with Two Levels 218
Independent Groups 218
Dependent Groups 232
Qualitative Variables with Three or More Levels 238
Tests for Three or More Means 238
Tests for Three of More Variances 245
Tests for Three or More Medians 246
Summary 247
Chapter Glossary 248
Questions and Problems 249
References 250
Notes 250

Chapter 8 Effects of a Qualitative Variable on a Qualitative Variable 251

The Situation at INCU 252
The Fit Y by X Platform for Qualitative Variables 252
The Logic of Chi-Square Tests for Contingency Tables 257
Correspondence Analysis 260
Two by Two Contingency Tables 261
Contingency Tables and the Classic Z Test 263
Risk Difference 264
Summary 266
Chapter Glossary 267
Questions and Problems 267
References 268
Notes 268

Terpening, Willbann D. Statistical Analysis for Business Using JMP®: A Student's Guide. Copyright © 2011, SAS Institute Inc., Cary, North Carolina, USA. ALL RIGHTS RESERVED. For additional SAS resources, visit support.sas.com/publishing.

Chapter 9 Effects of a Quantitative Variable on a Quantitative Variable 269

The Situation at INCU 270
Correlation Analysis 272
The Bivariate Platform and the Density Ellipse 273
Correlation Coefficient 275
Regression Analysis 278
Assumptions of Linear Regression 279
Regression Analysis in the Bivariate Platform 280
Summary 290
Chapter Glossary 290
Questions and Problems 291
Notes 292

Chapter 10 Effects of a Quantitative Variable on a Qualitative Variable 293

The Situation at INCU 294
Binomial Regression and the Logic of Logistic Regression 294
The Logistic Platform 296
Logistic Regression 296
Inverse Prediction 300
Multinomial Regression 302
A Multinomial Example 302
Multinomial Logistic Regression and ANOVA 304
Summary 306
Chapter Glossary 306
Questions and Problems 306
Notes 307

Part 5 Relationships between Multiple Variables

Chapter 11 Introduction to Multivariate Statistics: Multiple Regression 311

The Situation at INCU 312
Introduction to Multivariate Analysis: The JMP Platforms 312
Correlation Analysis and the Multivariate Platform 313
Multivariate Options 319
Multiple Regression and the Fit Model Platform 322
The Fit Model Platform 323
Multiple Regression Results 325

Terpening, Willbann D. Statistical Analysis for Business Using JMP®: A Student's Guide. Copyright © 2011, SAS Institute Inc., Cary, North Carolina, USA. ALL RIGHTS RESERVED. For additional SAS resources, visit support.sas.com/publishing.

Regression Diagnostics 330
Analysis of Residuals 330
Influence: Leverage and Outliers 335
Multicollinearity in Regression 338
Selecting Factors for Inclusion in the Model 340
Stepwise Regression 341
Nominal Variables in Regression 345
Dummy Coding 347
Summary 349
Chapter Glossary 350
Questions and Problems 351
References 351
Notes 351

Index 353
