

Updates for *Statistical Programming in SAS*

In Chapter 4, Page 129, the following code in Display 4.6:

```
if _n_=1 then set cstats; * read and process CSTATS data set first;  
set cstats;  
set country;
```

Should be:

```
if _n_=1 then set cstats; * read and process CSTATS data set first;  
set country;
```

The second line of code, "set cstats;" has been deleted.
