

## SAS<sup>®</sup> AppDev Studio<sup>™</sup>

### How to Proceed

Be sure to terminate all non-essential applications before proceeding with the installation of any CD. Disable any anti-virus software that may be running.

The system requirements and installation instructions for SAS AppDev Studio are located on the **SAS AppDev Studio Java Components** CD. Use the following steps to locate those documents:

1. Insert the **SAS AppDev Studio Java Components** CD into the CD-ROM drive. If the autoplay does not start, find `setup.exe` and execute it.
2. The **Choose Language** dialog opens. Select the language you would like to use for your installation and click **OK**.
3. The **SAS AppDev Studio Eclipse Plug-ins** index page opens in the right-hand pane of the SAS Software Navigator. Scroll down that page to the Prerequisites section for the system requirements documentation. The installation instructions are included as a link in the last cell in the install table.

We recommend either printing these documents or saving them to your desktop since they will be unavailable once you invoke the install executable. Follow the directions in those documents to install SAS AppDev Studio.
