The SAS® System
Release 8.2 (TS2M0)
CMS

Please Read Before Beginning Installation

Introduction

Alert Notes list problems that you need to be aware of before installing or using this software. Fixes and/or workarounds may be provided for the problems. Should you need assistance with the software, we ask that only the SAS Installation Representative or SAS Support Consultant call our Technical Support Division. Sites in the U.S. and Canada may call (919) 677-8008. Other sites should contact their SAS Installation Representative or SAS Support Consultant for the nearest SAS Institute office.

Installation and General SAS System Issues

- Alert Notes about Installation and General SAS System Issues are the only Alert Notes included in this document. For product-specific Alert Notes, please visit the following Web site:

  http://www.sas.com/service/techsup/search/alert_search.html

  On this Web page, choose the appropriate Operating System, Release, and how to sort your results.

- After your initial query of Alert Notes from the Web site listed above, it is essential that one or more representatives at your site subscribe to TSNEWS-L in order to receive future Alert Notes concerning your software. By subscribing, we will automatically email you with any new Alert Notes, removing the need for frequent visits to the Web site.

  To subscribe through email, send e-mail to LISTSERV@VM.SAS.COM. The body of the e-mail should read SUBSCRIBE TSNEWS-L.

  To subscribe through Technical Support's Web site, complete the Web form located at:

  http://www.sas.com/service/techsup/news/tsnews.html

- In order to obtain correct output when using the PUNCH device for Universal Printing, as described in "Using the PUNCH device for printing" in the *Installation Instructions and System Manager's Guide for Release 8.2 (TS2M0) of the SAS System under CMS*, it is necessary to create a new value in the SAS registry.

  Create a file named PUNCH SASXREG A containing the following two lines of text:

  ```
  [CORE\PRINTING\PSL\RECORD TYPE]
  "Punch"=int:2
  ```

Obtain write access to the SASHELP library and execute the following SAS statements:

```
PROC REGISTRY USESASHELP IMPORT="PUNCH SASXREG A"; RUN;
```

If the SASHELP library is installed in segments, they will need to be resaved.

SAS Note SN-004262 documents this problem.
