

QuickStart Guide to Your SAS® 9.1.3 Basic z/OS® Installation

Use this QuickStart Guide to help get your software installed as quickly as possible.

Several of the steps in this *QuickStart Guide* refer you to more detailed installation documentation. You can use a Web browser to view this documentation from either of the following locations:

- the **Documentation for Installing and Configuring SAS** CD, found inside the lid of your installation kit. (To begin, insert the CD into your CD-ROM drive and open `\documentation\eng\index.html`.)
- the Install Center section of our Web site, which is located at <http://support.sas.com/documentation/installcenter/913/kit/index.html>.

You can always find the most recent version of the installation documentation on the Install Center site.

- 1 Review the SAS Order Information sheet in this Getting Started folder.**
 - It is important to make sure that you have the correct software.
- 2 Refer to the *Alert Notes* and *System Requirements* to note issues that might affect the installation of your SAS software.**
 - Open either the Install Center or the **Documentation for Installing and Configuring SAS** CD, and select “Basic Installation Edition Kit.”
 - To see the *Alert Notes*, select the Alert Notes link for your operating system in the “Pre-Installation” section under “Alert Notes.” For the *System Requirements*, select the System Requirements link for your operating system.
- 3 Locate your SAS Installation Data (SID) file, which is attached to the Software Order E-mail that was sent to your SAS Installation Representative.**
 - You will need the data to complete your installation. Each SID file contains the licensing information, called the SETINIT, that is needed to complete your installation.
 - If you did not receive a SID file, contact the SAS Installation Representative at your site.
 - To have your SID file resent, go to <http://support.sas.com/adminservices-SID>.

Note: *SAS 9.1.3 Foundation is an entirely new system and should not be installed on top of any other versions of SAS® 9.*
- 4 If your Getting Started folder contains any Road Maps, use the procedures on them to complete your installation.**
 - The Road Maps contain product-specific instructions that over-ride the generic directions of this *QuickStart Guide*.
 - If you do not have any Road Maps, continue with Step 5.
- 5 Before you start your installation, please review “Chapter 1 — Performing Pre-Installation Tasks” in the *Installation Instructions for SAS 9.1.3 Foundation for z/OS*.**
- 6 You can install SAS 9.1.3 Foundation using one of two methods:**
 - The SAS Installation Wizard for z/OS on a PC running Windows—If information supplied to the Wizard is correct, the installer has appropriate permissions and user IDs, and adequate storage is available, etc., the Wizard will use this installation data to remotely launch a successful tailored z/OS batch installation. The installer will *not* need to use z/OS editors, etc., for the installation to proceed to conclusion. If you want to use the SAS Installation Wizard for z/OS to install SAS, refer to “Chapter 2 — Installing SAS 9.1.3 Foundation Using the SAS Installation Wizard for z/OS” in the *Installation Instructions for SAS 9.1.3 Foundation for z/OS*.
 - The traditional batch install—This method requires expertise in using MVS JCL, editing the SASEDITP control file unloaded from the media into your control data set, and creating/running installation jobs. If you want to use the traditional batch install to install SAS, refer to “Chapter 3 — Installing SAS 9.1.3 Foundation (Traditional Batch Method)” in the *Installation Instructions for SAS 9.1.3 Foundation for z/OS*.

Continued on back

7 After you complete your installation, refer to “Chapter 7 — Common Tasks” in the *Installation Instructions for SAS 9.1.3 Foundation for z/OS*, and follow the directions to verify your system installation.

Tips and Alert Notes

For the latest installation news, visit these sites for tips and Alert Notes that may not be in your documentation:

Technical Support

Should you need assistance with the software, we ask that only the SAS Installation Representative or the SAS Support Consultant call our Technical Support Division. For U.S. and Canadian customers, support is provided from our corporate headquarters in Cary, North Carolina. You may call (919) 677-8008, Monday through Friday.

Customers outside of the U.S. can obtain local-language technical support through the local office in their countries. Customers in these locations should contact their local office for specific support hours. See <http://support.sas.com/techsup/contact/index.html> for contact information for local offices.

Before calling, you may want to explore the SAS Institute Technical Support Web site at <http://support.sas.com/techsup/>. The Technical Support Web site offers a Knowledge Base, FAQs, Technical Support Documents and more that may answer your questions. This Web site also provides a mechanism for reporting problems.
