This Road Map briefly describes the media contained in your SAS Value Chain Analytics – Business Edition package and how to proceed to install the software.

Description of Your Package

Your SAS Value Chain Analytics software comes in a single installation kit, labeled SAS Value Chain Analytics – Business Edition Server.

How to Proceed

Be sure to terminate all non-essential applications before proceeding with the installation of any CD. Disable any anti-virus software that may be running.

- ❑ To identify the installation kit that contains SAS Value Chain Analytics – Business Edition Server, see the product listing on the SAS 9.1.3 label on each kit. Unless you have already done so, follow the steps in the *QuickStart Guide* in the Getting Started folder of the SAS Value Chain Analytics – Business Edition kit.
- ❑ Read and complete the tasks in the *SAS 9.1.3 Intelligence Platform: Installation Guide*, which is available on the **Documentation for Installing and Configuring SAS** CD or Install Center. On the first page, select **Planning Installation Edition Kit**, then select **SAS 9.1.3 Intelligence Platform: Installation Guide** in the “Installation” section under “Installation Instructions – SAS Intelligence Platform.” The *Installation Guide* takes you through the pre-installation, installation, and basic configuration steps to install your SAS Value Chain Analytics – Business Edition Server.
- ❑ Your installation requires job scheduling software from Platform Computing. Depending on the products in your installation, you have been provided with one of two different job schedulers. In the media container(s) inside your installation kit, locate either the three-volume set of **LSF JobScheduler for SAS** CDs or the five-volume set of **Platform Suite for SAS** CDs.

If your installation kit contains the **LSF JobScheduler for SAS** CDs, they should have been installed with the steps above. Follow the instructions on the *License Information--Platform JobScheduler for SAS* document to license your Platform Scheduling Server. The document is located on the **Documentation for Installing and Configuring SAS** CD or Install Center. On the first page, select **Basic Installation Edition Kit**, then select **License Information--Platform JobScheduler for SAS** in the “License Information” section under “Third-Party Licenses.”

If your software order includes the **Platform Suite for SAS** CDs, locate the *Installation Guide--Platform Suite for SAS* on the **Documentation for Installing and Configuring SAS** CD or Install Center. On the first page, select **Planning Installation Edition Kit**, then select **Installation Guide--Platform Suite for SAS** in the “Installation” section under “Additional Installation Instructions.” Follow the procedures in that document to install and configure your Platform Scheduling Server on the same machine where your SAS Value Chain Analytics – Business Edition Server is installed.

- ❑ The remaining steps are for the client machine. If your client machine will be different than your server, go to the client machine.
- ❑ Locate the **SAS Value Chain Analytics** CD in the media container(s) inside your installation kit. Insert the CD into your CD-ROM drive and follow the instructions that open to install the required software.
- ❑ Locate the **SAS Data Integration Studio** CD in the media container(s) inside your installation kit. Insert the CD into your CD-ROM drive and follow the instructions that open to install the required software.
- ❑ Locate the **SAS Client-Side Components, Volume 1** CD in the media container(s) inside your installation kit. Insert the CD into your CD-ROM drive and respond to the prompts. When the **SAS Client-Side Components Volume 1** window opens, find and click *SAS Management Console* in the left-hand pane. Follow the instructions that appear in the right-hand pane to install SAS Management Console.
- ❑ Locate the **SAS Enterprise Guide** CD in the media container(s) inside your installation kit. Insert the CD into your CD-ROM drive and respond to the prompts. Follow the instructions in the wizard to install SAS Enterprise Guide.
