SAS® Web Analytics

This Road Map briefly describes the media contained in your SAS Web Analytics package and how to proceed to install the software.

Description of Your Package

Your SAS Web Analytics software comes in as many as two installation kits. Each kit represents a distinct functional area of your SAS Web Analytics solution and should be installed on a separate machine:

- SAS Metadata Server
- SAS Web Analytics Server

How to Proceed

Be sure to terminate all non-essential applications before proceeding with the installation of any CD. Disable any anti-virus software that may be running.

Step 1: Install and configure the installation kit containing SAS Metadata Server.

❑ To identify the installation kit that contains SAS Metadata Server, see the product listing on the SAS 9.1.3 label on each kit. Unless you have already done so, follow the steps in the *QuickStart Guide* in the Getting Started folder of the SAS Metadata Server kit.

❑ Read and complete the tasks in the *SAS 9.1.3 Intelligence Platform: Installation Guide*, which is available on the **Documentation for Installing and Configuring SAS** CD or Install Center. On the first page, select **Planning Installation Edition Kit**, then select **SAS 9.1.3 Intelligence Platform: Installation Guide** in the "Installation" section under "Installation Instructions – SAS Intelligence Platform." The *Installation Guide* takes you through the pre-installation, installation, and basic configuration steps to install your SAS Metadata Server.

Step 2: Install and configure the installation kit containing SAS Web Analytics Server.

Note: *If SAS Web Analytics Server was included in the SAS Metadata Server installation kit, then this installation should be complete. Otherwise continue with this step.*

❑ To identify the installation kit that contains SAS Web Analytics Server, see the product listing on the SAS 9.1.3 label on each kit. Unless you have already done so, follow the steps in the *QuickStart Guide* in the Getting Started folder of the SAS Web Analytics Server kit.

❑ Read and complete the tasks in the *SAS 9.1.3 Intelligence Platform: Installation Guide*, which is available on the **Documentation for Installing and Configuring SAS** CD or Install Center. On the first page, select **Planning Installation Edition Kit**, then select **SAS 9.1.3 Intelligence Platform: Installation Guide** in the "Installation" section under "Installation Instructions – SAS Intelligence Platform." The *Installation Guide* takes you through the pre-installation, installation, and basic configuration steps to install your SAS Web Analytics Server.

❑ Your installation requires job scheduling software from Platform computing. Depending on the products in your installation, you have been provided with one of two different job schedulers. Locate either the three-volume set of **LSF JobScheduler for SAS** CDs or the five-volume set of **Platform Suite for SAS** CDs in the media container(s) inside your installation kit

If your installation kit contains the **LSF JobScheduler for SAS** CDs, they should have been installed with the second bullet. Locate the *License Information--Platform JobScheduler for SAS* document to license your Platform Scheduling Server. On the first page of the **Documentation for Installing and Configuring SAS** CD or Install Center, select **Planning Installation Edition Kit**, then select **License Information**--**Platform JobScheduler for SAS** in the "License Information" section under "Third-Party Licenses."

If your software order includes Platform Suite for SAS, locate the *Installation Guide—Platform Suite for SAS* on the **Documentation for Installing and Configuring SAS** CD or Install Center. On the first page, select **Planning Installation Edition Kit**, then select **Installation Guide**--**Platform Suite for SAS** in the "Installation" section under "Additional Installation Instructions."
