## What's New in SAS Text Miner 12.3

### ***What's New in SAS Text Miner 12.3***

SAS Text Miner 12.3 includes enhancements to node performance and results. The **Import** button has been replaced with the **Replace Table** and **Add Table** buttons in various dialog boxes so that you can choose whether to replace the currently selected table or add to the currently selected table. Results for the **Text Rule Builder** node include a new Document Rules table and a Rule Success graph.

You can use SMP mode in SAS 9.4 on a properly enabled SAS Server to deploy the **HP Text Miner** node in a process flow diagram, and use the HPTMINE procedure and the HPTMSCORE procedure. Using the **HP Text Miner** node in a process flow diagram can lead to multithreaded processing gains in many cases. For more information about the **HP Text Miner** node, see the HP Text Miner Node chapter of the *SAS Enterprise Miner High-Performance Data Mining Node Reference*.

For more information, see <http://support.sas.com/software/products/txtminer>.
