# A GE Money Success Story - IT Makes a Difference

William Klancko, GE Money  
John Smale, Sun

## ABSTRACT

Do many different departments use SAS within your organization? Does your organization suffer from "SAS Sprawl" - where SAS is installed on many separate computer systems? As a result of "SAS Sprawl", does your SAS user community complain of poor performance, a lack of central administration, security concerns and excessive licensing and hardware costs? Learn how GE Money embarked on a consolidation effort to eliminate "SAS Sprawl" by utilizing "virtual environments" to deploy SAS on a single Sun Microsystems server. Find out how this improved life for the SAS user community AND saved GE Money over one million dollars in the first year of deployment.

**No paper was submitted for publication in the *Proceedings*.**
