Metadata Promotion in SAS® 9.2

Diane Hatcher, SAS Institute Inc.
Eric Bourn, SAS Institute Inc.

ABSTRACT

Promotion of metadata content is typically used to support movement across DEV, TEST, and PRODUCTION environments. In SAS® 9.1.3, we provided tools for full repository promotion and partial promotion. In SAS® 9.2, these tools have been enhanced to streamline functionality and provide batch interfaces. SAS® Management Console will continue to provide interfaces for full repository replication and partial promotion via the export/import framework that exists in SAS® 9.1.3 with the BI Manager plug-in. In SAS 9.2, we have implemented a batch interface for the partial promotion framework that will allow you to create a schedulable and repeatable process for moving a set of metadata content across your environments.
