

Paper 340-2008

Cost Allocation Management for IT: the Gas Natural Informática Experience

Ignaci Fernández, Gas Natural Informática

ABSTRACT

Nowadays when most projects are developed by outsourcers, companies need to size them accurately in order to guarantee that they will be executed on time and with the quality and costs stipulated. Thanks to SAS® powerful analytical and forecast capabilities, now Gas Natural can estimate and forecast the cost and effort required in each phase. This helps them control the time and cost of more than 2,000 IT projects that GAS Natural has per year.

Through this presentation attendees the audience will learn:

- How to improve quality and efficiency in computing projects
- How to regain control in the all the phases of computing projects by estimating and forecasting the costs and efforts required on each phase (assessment, design, construction, test and support)
- How to share the benefits of outsourcing within the organization

No paper was submitted for publication.
