

Paper 379-2008

New Directions in JMP®

John Sall, SAS Institute Inc.

ABSTRACT

With its new ability to run SAS® stored processes and read data from a meta-server, JMP® offers a powerful way to explore your SAS data using interactive graphical visualization tools. There are now a number of products that link SAS analytics with JMP visualization to get the most information from your data. This talk shows some of these new capabilities as well as highlighting the innovative new tools in JMP for analyzing data with many missing and outlying values.
