The Future of SAS® Deployment for 9.2 and Beyond

Mark Schneider, SAS Institute Inc.

ABSTRACT

As the SAS® architecture has grown to serve the complex and distributed challenges of Enterprise-wide deployments, the tools used to plan, install, and configure SAS software have needed to grow in lockstep. The 9.2 release of the SAS Enterprise Intelligence Platform will see an accompanying revolution in the way SAS Software is deployed, including such advancements as Intelligent Planning, Electronic Software Download, Customized Media, Silent Installs, Streamlined Dialogs, Capture/Replay, and SAS Software Depot Management. This paper describes these enhancements and others, in addition to providing a glimpse a bit farther into the future for SAS deployment.

No paper was submitted for publication.
