

**Paper 270-26**

## **Field Test Experiences with Linux**

This presentation will discuss the Linux field test from the user point-of-view. You will hear how at least one user went about testing Linux and converting applications - and whether things happened as expected!

Since the field test was in process at the time the SUGI papers were being selected, the actual presenters were not confirmed. To learn more about the actual presentation, please contact the Systems Architecture Section Chair, Deb Cassidy, at [deb.cassidy@cardinal.com](mailto:deb.cassidy@cardinal.com). She will provide you the contact information.
