Rule Development Experimentation: Determining the Best Marketing Message

Howard Moskowitz, MJI Design Lab
Dana Rafiee, Destiny Corporation

ABSTRACT

Completely scalable for organizations of any size, locally or worldwide and even for those with limited budgets, RDE is an automated seven-step process. It defines how to design, test, and modify alternative ideas, packages, products, or services in a disciplined way so that companies discover what appeals to the customer, even if the customer cannot articulate the need, much less the solution. RDE is a proven solution, which has direct, major impact for those managers with bottom-line accountability. It is the fastest, most cost-effective and intuitive way for executives and managers to stay well ahead of the customer demand curve. These results feed directly into the SAS® analytic warehouse to create innovative customer understanding for targeted sales.

No paper was submitted for publication.
