DEPLOYING SAS® PRODUCTS ON RED HAT PLATFORMS: WHAT IT ADMINISTRATORS SHOULD KNOW

Barry Marson, Red Hat, Inc.

ABSTRACT

When deploying SAS® products on Red Hat platforms, there are subsystems that need to be set up and configured properly from the very start. While some of these subsystems and tuning are easy to fix later on, others can have a dramatic effect on performance and scalability and can be very costly to fix, especially once your data sets have been deployed. We are here to discuss some of the places where many of the more costly mistakes are made.
